International Scientific Conference

Cretan graphical and Babylonian astronomical - chronological systems in
Georgian alphabet and monuments

October 9-11, 2014, Tbilisi

On October 9-11, 2014, Georgian Technical University and a magazine “Kartvelologia” organize an International Conference in the field of Kartvelian studies devoted to origination of the Georgian written language and to analyzing of its astronomical-chronological parameters. It will be represented that the information applied on the archeological monuments of the written language certifies that Georgian people had not only their own independent written language since the ancient years but their own national chronicle as well that is confirmed by a contemporary archeological-astronomic researches.

The conference will be interesting for scientists whose activity is connected with Kartvelian studies, Chronology, Oriental Studies, Byzantiology, Information Technology, Mathematics and history of cosmography.

It will be a great respect for us if you will take a part in the conference.

In case of your interest, please, submit your personal data by e-mail, and if you have a desire to make a report, - title of your report till the 30th of June, 2014; theses of reports containing 1-2 pages, - till the 25th of July, 2014.

Sincerely,

Conference organizational committee
