

ტექნიკის მეცნიერებათა კანდიდატი, ასოცირებული პროფესორი

ნინა ილიას ასული ჩეჩელაშვილი

1. Research of shore's form change provoked by dynamic interaction of river-bed flows with deep reservoirs and by change of river's hydrologic regime. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, th.19, dep.2, 1964.
2. Hydraulic of open spillway. Connecting of high-speed aercial flows with lower pool by means of immersed hydraulic jump. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, th.20, dep.3, 1964.
3. Dynamic interaction of river-bed flows with deep reservoirs and investigation of shore's form change. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, th.19, dep.1, 2, 1965.
4. Research of shore's form change provoked by dynamic interaction of river-bed flows with deep reservoirs and by change of river's hydrologic regime. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, th.7, 1966.
5. Balance of turbulent flows and rise of wave motion on high-pressure spillway's constructive and evasive non-pressure tunnels' water-pipe tracts. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, th.2, dep.3, 1967.
6. Transitional processes of transient regime of flow in critical depth's neighborhood in turned construction and tunnels. Works of construction and hydroenergetics scientific and researching institute of Tbilisi, issue 1, 1968. p.17-34.
7. Energy extinction in limits of water-extinguishing buildings and unbalanced regime of flows during pools' connecting. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, th.6, dep.2, 1968.
8. Unfluently-changeable flow with a free surface. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, vol.18, 1969, p.138-148.
9. Transient regime of a fixed bottom hydraulic-jump. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, vol.18, 1969, p.128-137.
10. Rise of transitional regime of flow in pipe-line without push but with almost critical slope. Works of 2nd scientific-technical conference. University of Kiev, 1969. p.225-228.
11. Investigation of seashore dynamic in places of connection with rivers. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, th.38, 1969.

12. Energy extinction in lower pool and unbalanced regime of flows during pools' connecting. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, th.22, 1970.
13. Rise of transitional regime of flow in pipe-line without push. News of Construction and Hydroenergetics Scientific and Researching Institute of Tbilisi, issue 2, 1970, p.82-88.
14. Research of wave oscillation of flow behind hydraulic-jump. Material of young scientist conference of hydroenergetic construction and hydromelioration. 1971. p.156-161.
15. Investigation of dam's split and transformation of split's wave in pool. Georgian Scientific and Researching Institute of Construction and Hydroenergetics, th.21, 1973.
16. Investigation of dam's split and transformation of split's wave in pool. Georgian Scientific and Researching Institute of Construction and Hydroenergetics, th.121, 1976.
17. Investigation of equation of free surface liquids' sharply changing motion. GTU, Budget theme 10/3, 1979.
18. Investigation of Hydro Power Station VARTSIKHE's conductivity and unbalanced regime during the emergency cancellation of loading. GTU, contractual theme 13-087/80, 1980.
19. Investigation of non-linear oscillations in seashore zone. GTU, Budget theme 10/3, 1981.
20. Influence of surfing wave on lengthwise shore-protecting structures. All-Union scientific-technical conference. Odessa, 1981.
21. Influence of surfing wave on lengthwise shore-protecting structures. Materials of Hydrotechnical Conferences, 1982.
22. Finding speed of flows' gravitational move on a seashore slope. Works of Oceanology Institute at Academy of Sciences, Moscow, 1984.
23. Solution of some problems of gravitational move hydraulics in seashore zone. GTU, Budget theme 8/3, 1984.
24. Theory of wave motion of water in unprismatic reservoir. Questions of perfection works of hydromelioration system and promote them efficiency, p.10-14, 1986.
25. Investigation of solutions of differential equations describing wave motion of water in mountain reservoir. XI conference of Georgian Higher Schools mathematicians. Kutaisi. 1986.

26. Hydraulic problems of Western Georgian river-beds regulation. GTU, Budget theme 9/3, 1987.
27. Deliver summary laboratory works in higher mathematics. Researching-methodical conference. Batumi.1987.
28. Math's sums collection. Pupils' manual. "Ganatleba", Tbilisi, 1988.
29. Dynamics of the Georgian black sea shore and optimal designs of artificial stabilization. International Symposium on "Engineering geology of the shelf and continental slope of seas and oceans". Theses, p.161-162, 1988.
30. Collection of lectures concerning main numerical methods. GTU, 1989.
31. Laminar wave motion of water in reservoir at selective water intake from its upper layer. Hydraulic and hydrologic investigations of single and double phase liquid flow. Transactions #13(355), p.41-45, 1989.
32. Mathematical model of laminar wave of water in reservoirs at internal selective water intake. Hydraulic and hydrologic investigations of single and double phase liquid flow. Transactions #13(355) p.46-48, 1989.
33. Some problems concerning wave motion of liquid in natural river-beds. GTU, Budget theme, 1990.
34. Math's exercises concourse collection. "Evrika", Tbilisi, 1992.
35. Finite-differences methods of solution boundary value problems connected with water motion in natural river-beds and reservoirs. GTU, Budget theme, 1993.
36. Estimation of knowledge by rating system in Georgia Technical University. Republican researching-pedagogical conference. Tbilisi.1993.
37. About teaching programs in higher mathematics. First International researching-pedagogical workshop. Lagodekhi.1994.
38. About math's teaching program in Georgian Universities and in some English Universities (Cambridge, Oxford). Republican Scientific-pedagogical conference, Tbilisi, 1994.
39. About math's teaching at some Departments of Cambridge and Oxford. Republican Scientific-pedagogical conference, Tbilisi, 1994.
40. Literature published on the base of entrance math examinations at Georgian Technical University (in 1986, 87, 89, 91 years) – as trial to create system of raising of teaching. Republican Scientific-pedagogical conference, Tbilisi, 1994.

41. Literature published on the base of entrance math examinations at Georgian Technical University – as trial to create system of raising of teaching. IMSEP – 94, Intelligence Management Systems for Educational Processes. First International Scientific Pedagogical Seminar, Lagodekhi, 1994.
42. Part of entrance examinations in raising of mathematical culture in schools. IMSEP – 94, Intelligence Management Systems for Educational Processes. First International Scientific Pedagogical Seminar, Lagodekhi, 1994.
43. Solution of boundary value problems connected with water motion by using method of finite-differences. Republican researching-pedagogical conference. Lagodekhi. 1995.
44. Research of differential equation's solutions describing wave motion of water in mountain reservoirs. Scientific – pedagogical conference, Lagodekhi, 1995.
45. Finite-differences methods of solutions of boundary problems of water motion in natural river-beds and reservoirs. Scientific – pedagogical conference, Lagodekhi, 1995.
46. Decomposition of determinant with polynomial elements. Scientific – pedagogical conference, Lagodekhi, 1995.
47. Elaboration of mathematical model for statistical maintenance of educational system's management. Statistical maintenance of educational system management – component “G” of realization of educational reform program, 1996.
48. About some changes in rating system. Scientific–pedagogical conference dedicated to GTU's 75th anniversary, 1997.
49. Elaboration of mathematical model for statistical maintenance of educational system's management. Statistical maintenance of educational system management – component “G” of realization of educational reform program, 1997.
50. Creation of program maintenance for elaboration of statistical forms. Statistical maintenance of educational system management – component “G” of realization of educational reform program, 1998.
51. Some points connected with teaching undergraduate mathematics in Technical Universities. 2nd International Conference on the Teaching of Mathematics (ICTM2). University of Crete, 1—6 July, 2002. Hersonissos, Crete. GREECE.
52. On one approach to hydraulic analysis of flow conjugation units and energy dissipator. “Energy”, № 4 (36), part 2, Tbilisi, 2005.
53. Some problems of wave motion of water. International Congress of Mathematicians, ICM, Madrid, 2006.

54. Mathematics for some engineering specialities. Part I. Tbilisi, 2007.

55. Mathematics for some engineering specialities. Part II. Tbilisi, 2008.
