

**European Centre for Nuclear Research “Atlas” Project Implementation  
at Georgian Technical University**

On the basis of the agreement put between European Centre for Nuclear Research and Georgian Technical University, the scientists of Georgian Technical University participated in the “Atlas” project implementation. In particular, on the basis of the technical characteristics made by CERN by the effort of our scientists for the purpose of the project implementation was drafted work project comprising the design of small sized protective aluminum wheels of nine meter diameter and constructing the necessary appliance for its proper functioning. Nowadays under the guidance of Georgian Technical University the above mentioned two aluminum structures are being constructed on the basis of the factory LTD “ELITA-BURJI”.

დამცავი მცირე თვალი -small sized protective wheel

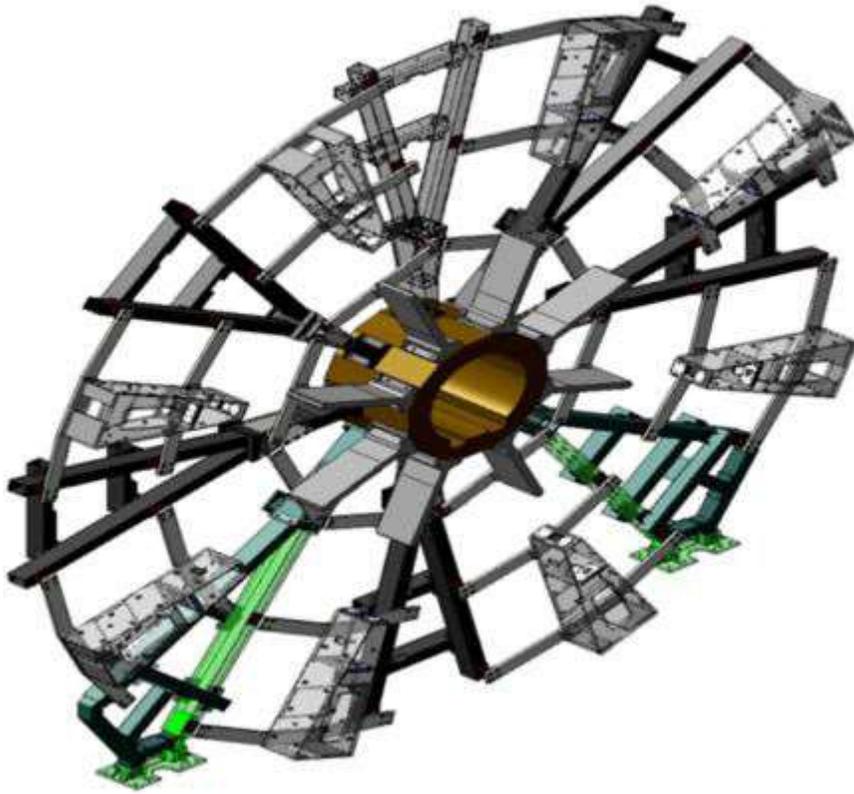

დეტექტორი - detector

დამცავი მცირე თვალი - small sized protective wheel

დამცავი მცირე თვლის საფარი - the cover of small sized protective wheel

ალუმინის სტრუქტურა - aluminum structure

ალუმინის სტრუქტურა- aluminum structure
