

A world map with a blue grid background. The map shows the continents of North America, South America, Europe, Africa, Asia, and Australia. Several regions are highlighted in orange, indicating EIFL service areas. These include parts of North America (USA and Canada), most of Europe, large parts of Africa (including Egypt, Sudan, Ethiopia, Kenya, Tanzania, and South Africa), and large parts of Asia (including China, India, and Southeast Asia).

EIFL

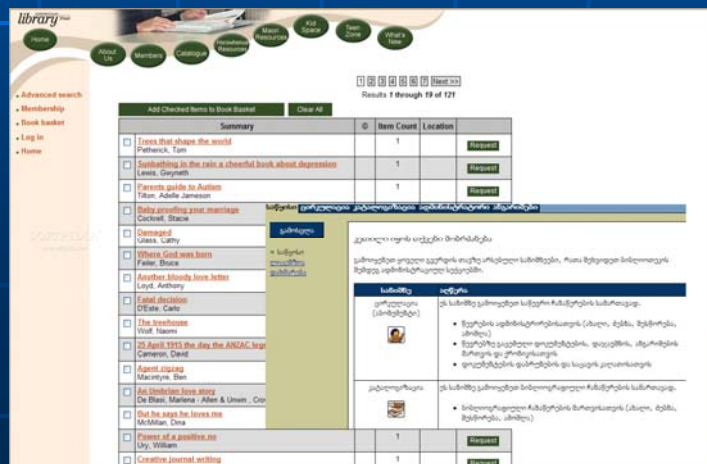

EIFL არის საერთაშორისო არასამთავრობო ორგანიზაცია რომელიც საშუალებას აძლევს აფრიკის, აზიის, სამხრეთ ამერიკისა და ევროპის 60-ზე მეტი განვითარებადი და გარდამავალი ქვეყნების ბიბლიოთეკებს შეღავათიან ფასად ინტერნეტის საშუალებით ისარგებლონ მსოფლიოს მრავალი ცნობილი გამომცემლობების ჟურნალებით, ელექტრონული წიგნებითა და სხვა მრავალი მონაცემთა ბაზებით. დაარსდა 1999 წელს. საქართველოს ბიბლიოთეკების ინტეგრირებული ქსელის კონსორციუმი (**GILISC**) მისი წევრია 2001 წლიდან დღემდე.

საქართველოს საბიბლიოთეკო ასოციაცია საქართველოს ბიბლიოთეკების ინტეგრირებული ქსელის

კონსორციუმის მთავარი ინიციატივები

- ლიცენზირების პროგრამა: ელექტრონული სამეცნიერო ჟურნალები
- თავისუფალი წვდომის პროგრამა
- საავტორო უფლებების დაცვა

GEORGIA'S BANKING LANDSCAPE

Contents: Playing By New Rules From Rubble To Empire

Listen American Accent Medium Reading Speed Download MP3 Help

The industry has struggled -- Georgia leads the nation in bank failures. There are a few bright spots, but bankers worry about the costs of new regulations

"In the land of the blind, the one-eyed man is king." It originates with 16th century Dutch philosopher Desiderius Erasmus, But it's also a lyric from the Tom Waits song, Singapore, and a line from the Steven Spielberg film, Minority Report.

SOUTH Ossetia War, 2008
RUSSIA (Federation) -- Foreign relations
- Geographic Terms:** GEORGIA (Republic)
SOUTH Ossetia (Georgia)
ABKHAZIA (Georgia)
RUSSIA (Federation)
- Abstract:** The article explores regional relations and political conditions in unrecognized Eurasian states such as South Ossetia and Abkhazia within Georgia. The author reflects on the Russia-Georgia war of 2008 and its impact on Western policy towards the region. Emphasis is given to Russian and Georgian disputes over the independence and autonomy of Abkhazia and South Ossetia. The author notes the economic and security dependence of Abkhazia on Russia. Other topics include the expulsion of ethnic Georgians from Abkhazia, the relationship between territorial integrity and sovereignty, and U.S. political engagement with Abkhazia.

Since founding DecisionPath Consulting in 1999, Nancy and I have had the privilege of working with great clients and colleagues. We have always approached our engagements in the spirit of partnership: we bring our general business knowledge, enthusiasm, and expertise in business intelligence and data warehousing, and our clients afford us an opportunity to help them succeed. In the process of achieving those successes, we've observed a variety of challenges that can derail even the most promising BI opportunities. Simply put, most of these challenges are *business* challenges.

This experience has led us to conclude that if companies are going to fully realize the profit potential of business intelligence (BI), there needs to be a better understanding of BI in the executive and managerial ranks. That is the reason for this book.

At the enterprise level, BI has demonstrated its ability to improve profits by tens or hundreds of millions of dollars annually, depending on the size of the company. Accordingly, BI should be a key tool for managing and improving performance—and profits—at just about any company in just about any industry. It should certainly rank alongside of management tools and techniques such as Strategic Planning, Benchmarking, Pay-for-Performance, Outsourcing, Customer Segmentation, Reengineering, Balanced Scorecard, and Total Quality Management.

That being said, many large companies tend to see BI as primarily a technology play. Thus, they fail to focus on the business challenges of leveraging business information and analytical techniques to drive better performance and improved profits. Some of the typical business challenges we have seen include:

- Misalignment between business strategies, core business processes that drive performance, and the BI program or initiative
- Lack of clarity about how BI will be used *by the business* to improve profits
- Insufficient leadership to drive changes to how the company uses information and analytical tools to drive results
- Insufficient recognition by IT management that BI needs to be managed differently than transactional systems
- Weak business sponsorship and lack of accountability for the BI program or initiative
- Under-investment in developing BI and data warehousing core competencies

In addition to observing these business challenges first-hand in many different companies, we also hear these themes echoed by the BI professionals we meet when we teach at industry conferences. On the flip side, we serve as judges for TDWI's annual best practices competition: a key aspect of winning companies is their ability to overcome such challenges. More broadly, by improving business performance, BI helps companies compete successfully in an increasingly global economy, which protects local jobs, economies, and communities.

Since founding DecisionPath Consulting in 1999, Nancy and I have had the privilege of working with great clients and colleagues. We have always approached our engagements in the spirit of partnership: we bring our general business knowledge, enthusiasm, and expertise in business intelligence and data warehousing, and our clients afford us an opportunity to help them succeed. In the process of achieving those successes, we've observed a variety of challenges that can derail even the most promising BI opportunities. Simply put, most of these challenges are *business* challenges.

This experience has led us to conclude that if companies are going to fully realize the profit potential of business intelligence (BI), there needs to be a better understanding of BI in the executive and managerial ranks. That is the reason for this book.

At the enterprise level, BI has demonstrated its ability to improve profits by tens or hundreds of millions of dollars annually, depending on the size of the company. Accordingly, BI should be a key tool for managing and improving performance—and profits—at just about any company in just about any industry. It should certainly rank alongside of management tools and techniques such as Strategic Planning, Benchmarking, Pay-for-Performance, Outsourcing, Customer Segmentation, Reengineering, Balanced Scorecard, and Total Quality Management.

That being said, many large companies tend to see BI as primarily a technology play. Thus, they fail to focus on the business challenges of leveraging business information and analytical techniques to drive better performance and improved profits. Some of the typical business challenges we have seen include:

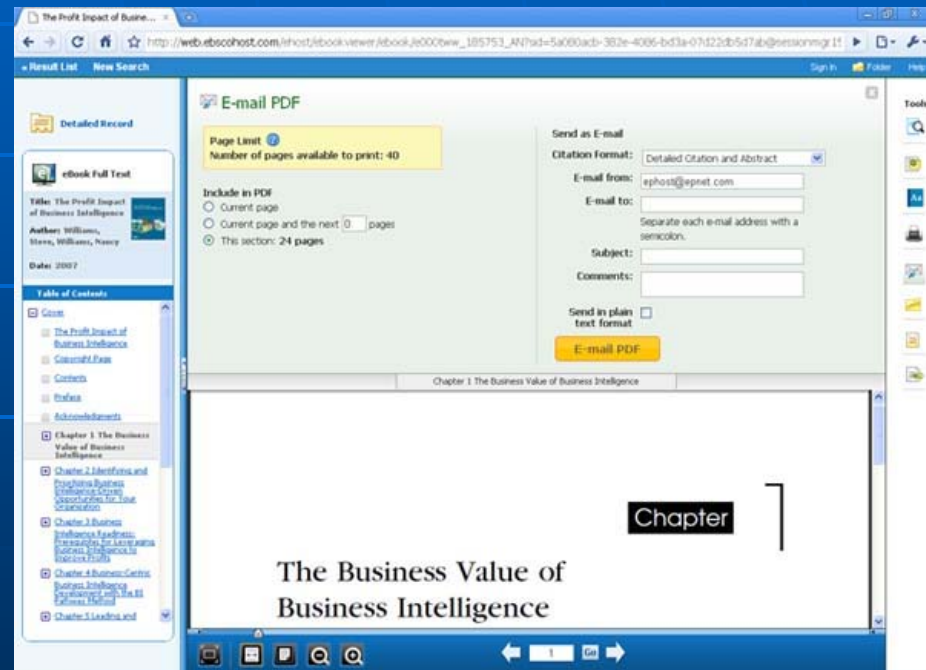

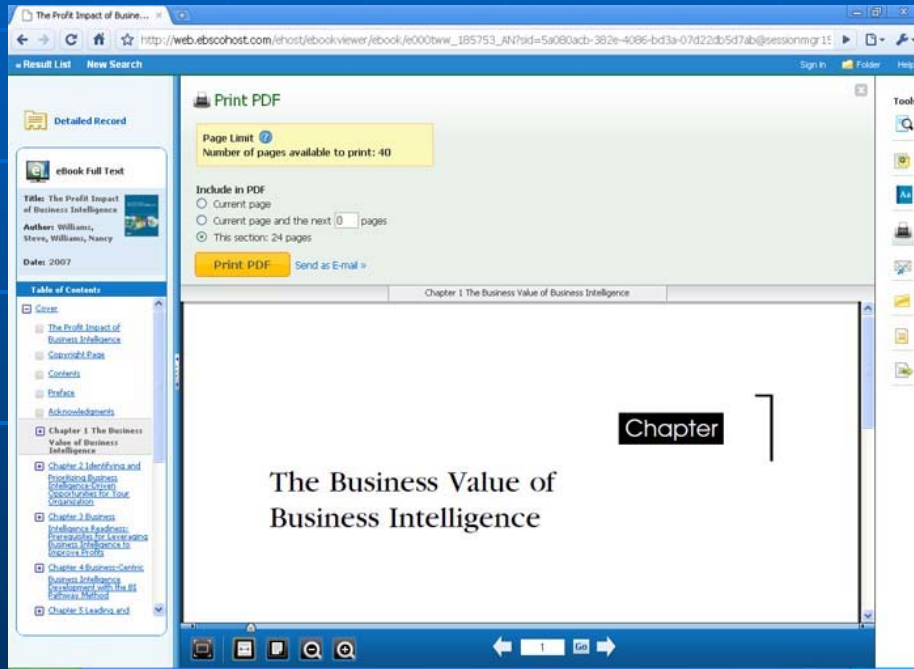

- Misalignment between business strategies, core business processes that drive performance, and the BI program or initiative
- Lack of clarity about how BI will be used *by the business* to improve profits
- Insufficient leadership to drive changes to how the company uses information and analytical tools to drive results
- Insufficient recognition by IT management that BI needs to be managed differently than transactional systems
- Weak business sponsorship and lack of accountability for the BI program or initiative
- Under-investment in developing BI and data warehousing core competencies

In addition to observing these business challenges first-hand in many different companies, we also hear these themes echoed by the BI professionals we meet when we teach at industry conferences. On the flip side, we serve as judges for TDWI's annual best practices competition: a key aspect of winning companies is their ability to overcome such challenges. More broadly, by improving business performance, BI helps companies compete successfully in an increasingly global economy, which protects local jobs, economies, and communities.

Royal Society Publishing - journals

The screenshot displays the Royal Society Publishing website interface. At the top, there is a navigation bar with links for 'About us', 'Help', 'Contact us', 'Feedback', and 'Sitemap'. The main header features the Royal Society Publishing logo and the tagline 'Informing the science of the future'. Below this, there are links for 'Journals', 'Authors', 'Librarians', 'Other titles', and 'News'. A search bar is prominently displayed with the text 'Search Our Journals' and a 'Search' button. A featured article section highlights a new article in 'Open Biology' about the essential role of APC tumour suppressor in Axin complex assembly and function. The main content area is organized into a grid of journal tiles, each with a cover image and a brief description:

- Philosophical Transactions B**: Each issue of *Philosophical Transactions B* is devoted to a specific, topical area of the biological sciences.
- Proceedings B**: *Proceedings B* is the Royal Society's flagship biological research journal, dedicated to the fast publication and worldwide dissemination of high-quality research.
- Biology Letters**: *Biology Letters* offers rapid publication of short, innovative and cutting-edge research articles and opinion pieces, accessible to scientists across the life sciences.
- Open Biology**: *Open Biology* is an online, open access journal covering biology at the molecular and cellular level.
- Philosophical Transactions A**: Each issue of *Philosophical Transactions A* is devoted to a specific, topical area of the physical sciences.
- Proceedings A**: *Proceedings A* publishes research articles across the mathematical, physical and engineering sciences.
- Interface**: *Journal of the Royal Society Interface* publishes cross-disciplinary research at the interface between the physical and life sciences.
- Interface Focus**: *Interface Focus* publishes themed issues covering cross-disciplinary research at the interface between the physical and life sciences.
- Notes & Records**: *Notes and Records* is an international journal which publishes original research in the history of science, technology and medicine up to and including the 21st century.

Multistability in perception: binding sensory modalities, an overview

Abstract

This special issue presents research concerning multistable perception in different sensory modalities. Multistability occurs when a single physical stimulus produces alternations between different subjective percepts. Multistability was first described for vision, where it occurs, for example, when different stimuli are presented to the two eyes or for certain ambiguous figures. It has since been described for other sensory modalities, including audition, touch and olfaction. The key features of multistability are: (i) stimuli have more than one plausible perceptual organization; (ii) these organizations are not compatible with each other. We argue here that most if not all cases of multistability are based on competition in selecting and binding stimulus information. Binding refers to the process whereby the different attributes of objects in the environment, as represented in the sensory array, are bound together within our perceptual systems, to provide a coherent interpretation of the world around us. We argue that multistability can be used as a method for studying binding processes within and across sensory modalities. We emphasize this theme while presenting an outline of the papers in this issue. We end with some thoughts about open directions and avenues for further research.

The screenshot shows the Cambridge Journals website. At the top, there is a navigation bar with links for Home, Contact Us, Site Map, Help, FAQ, Accessibility, and Register. The Cambridge logo and 'JOURNALS' are prominently displayed. A search bar is located in the top right, with options for 'Basket' and 'Log in'. Below the navigation bar, there are tabs for 'About Us', 'News', 'Browse Journals', 'Authors', 'Societies', 'Librarians', 'Agents', and 'Users'. A 'Quick Search' section is present, featuring a dropdown menu for 'Journal and Book Content', a search button, and links for 'Advanced Search' and 'CrossRef Search'. The main content area is divided into several sections: a welcome message for eIFL Science Georgia, a 'Register for an Account' button, a 'CJO has three releases of new and updated functionality each year...' announcement with a 'Read More' button, and a 'Browse Journals' section with a dropdown menu for 'All Categories'. A featured journal, 'Journal of Developmental Origins of Health and Disease', is highlighted with its cover image and a 'New in 2010' note. A sidebar on the left contains a 'Welcome to eIFL Science Georgia' message and a 'Register for an Account' button. A large banner at the bottom left reads 'Older and wiser' and mentions the '2010 Cambridge Journals Digital Archive Complete Collection'.

Abstract

The European fruit lecanium (EFL), *Parthenolecanium corni* Bouché (Hemiptera: Coccidae), is a common and harmful soft scale, which attacks *Fraxinus excelsior* Willd. and other ornamental and orchard plants in Tbilisi, Georgia. This study investigates the phenology, degree of plant damage and effect of parasitoids on this scale in Tbilisi, a densely populated area. We present data on the 32 species of chalcidoid parasitoids recorded from EFL in Georgia and south-eastern Europe. The scale is heavily parasitized in Tbilisi, but we did not find any variation in seasonal abundance. The most common parasitoid of EFL was *Blasattus longipennis* (Hymenoptera: Encyrtidae).

Keywords: Coccidae, Chalcidoidea, Encyrtidae, Georgia, Transcaucasus

Nesting Food of European Hole-Nesting Passerines: Do We Know Enough to Test the Adaptive Hypotheses on Breeding Seasons?

Maria Cholewa & Tomasz Wesolowski

Laboratory of Forest Ecology, Wrocław University, Senkiewicza 21, 50-335 Wrocław, POLAND, e-mail: mcholewa@biol.uni.wroc.pl

Abstract.

Hole-nesting passerines constitute a 'model' group for which importance of synchronisation between food availability — mainly caterpillars — and appearance of nestlings is commonly postulated. Is there an adequate set of data allowing one to prove this relationship? The recent climate change could lead to a mis-match between food peaks and nestlings' appearance. Do the data exist that show that the birds have switched to other food sources? We analyse data on nestling food of eleven European hole-nesting passerines (138 papers). The diet of some species is hardly known (< 100 broods observed), there are large gaps in geographical coverage (70% of data from five countries — Germany, Polesia, Slovakia/Czech Republic, Poland and Great Britain) and most of studies do not meet the minimum requirement of representativeness (three seasons, ≥ 20 broods/season), which limits their external validity. The majority of investigations were done decades ago, in different conditions and most probably they cannot be treated as representative for the current situation. There is no study in which the past (before warming) and current nestling diet in the same local population have been compared, so, direct empirical support for the 'mismatch' idea is rather weak. Knowledge of nestling diet and its variation is far from adequate and, hence, properly designed, studies are needed.

Received: June 2011, Accepted: December 2011

The screenshot shows a Mozilla Firefox browser window displaying the Facebook page for GILISC. The browser's address bar shows the URL <https://www.facebook.com/GILISC>. The page header includes the Facebook logo and a search bar. The main content area features a navigation menu with options like 'საქართველოს ბიბლიოთეკების ინტეგრირებული ქსელის კონსორციუმი', 'Timeline', and 'შეჯამება'. Below this, there are several posts from the GILISC page, each featuring a collage of various academic and library-related images and text. The right sidebar contains an 'Admin Panel' and a list of users who have liked the page, including names like Ruddy Peach, Ketevan Kvetsishvili, and others. The bottom of the page shows a search bar and a 98% zoom level.
